

Industrial Arts Project Guide

Make an Industrial Arts project using any of your favorite building techniques or designs. Research your choice and create a unique presentation for the class, such as a diorama, display, poster or mobile.

Your project needs to include these important factors:

- Project information (in any order): your name, the project title, teacher's and class name and the date
- A handmade project relating to your math choice
- A written description of your project relating to your math choice
- Three note cards with the name of your three different resources used for your research. You must use one resource from each of these:
 - Internet
 - A published book
 - An expert (such as a builder, interior designer, landscaper)

Possible categories from which to choose a topic include:

- Frank Lloyd Wright Home Designs
- Geodesic Domes
- Straw bale Homes
- Green Homes
- Cob Homes

Below are some suggestions for your final project:

- Create a display on a tri-fold board or poster board
- Create a scrapbook with fascination facts and pictures
- Create a mobile
- Create a diorama
- Make a game
- Create an exhibit for a museum
- Come up with your own original design

The more unique and original your project is, the better. Although there will be some research time provided, this project will be done almost entirely outside of class.
