

- Leopard Spot

Use the Leopard Spot paint technique to realistically color rock castings. Let colors run together naturally. Rinse brush between steps.

- Dilute Rock Colors with water. (See Rock Colors pg. 171)
- Using a Foam Brush, randomly dab Yellow Ocher Color Wash over 1/3 of rock.
- Randomly dab Burnt Umber Color Wash over a different 1/3 of rock.
- Brush and dab Black Wash over entire rock to tie colors together.

NOTE: Let rock castings dry 2-3 hours before coloring
