

THEME KIT

FARM KIT SP4241

INSTRUCTIONS

Micro Sticky Spots (Fig. 1)

1. **How to Apply Sticky Spots to Paper:** Press a Sticky Spot onto the area marked with • and lift off the backing paper.

Prepare Buildings

1. All cutouts that are printed on card stock are pre-cut. Punch out each component along the pre-cut solid lines.
2. Keep parts for each different cutout together.

Barn (Fig. 2 and 3)

NOTES: The front of the Barn has double Loft Doors and the back of the Barn has a single Loft Door. We recommend using a ruler or straightedge to line up the Walls of the Barn.

1. Fold all of the Barn tabs backwards.
2. To attach the Right Wall to the front face of the Barn, apply Sticky Spots to the • markings on the left-hand tab of the Right Wall. Press the Right Wall's Sticky Spot tab to the back edge of the Barn Front, creating a corner.
3. Apply Sticky Spots to the • markings on the right-hand tab of the Right Wall. Line up the back edge of the Barn with the Right Wall's Sticky Spot tab and press into place, creating a second corner.
4. Apply Sticky Spots to the • markings on each side tab of the Left Wall. Attach the right tab to the Barn Front's back edge, creating a third corner.
5. Stand the Barn upright. Attach the back of the Barn over the Left Wall's left tab, creating the fourth corner. Press into place. (**Fig. 2**)
6. There are two parts of the Roof that need to be joined together. Apply Sticky Spots to the • markings on the Roof's tab. Press the other half of the Roof together with that tab. Fold the scored lines to match the contour of the Roof shape.
7. Apply Sticky Spots to the • markings on each of the Barn Front's four Roof tabs. Repeat this step with the Barn's Back Wall Roof tabs. Center Roof on the top of the Barn frame and press into place.
8. Apply Sticky Spots to the • markings behind the right side of the Door. Position the Door as desired, either open or closed. Repeat this step with the remaining Door. (**Fig. 3**)

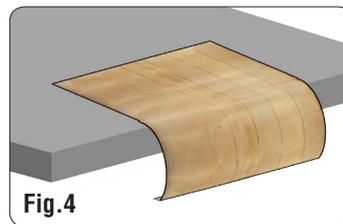

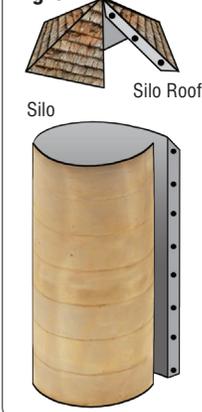

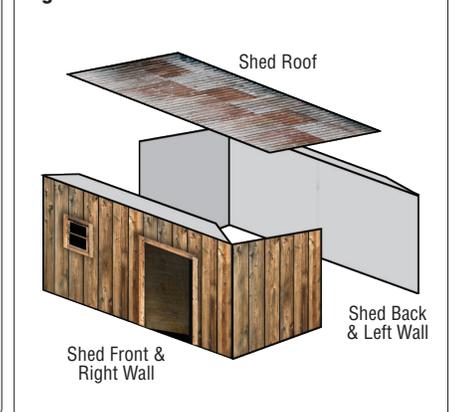

Fig.4

Fig.6

Silo (Fig. 4 and 5)

1. Bend Silo into a round shape by using the edge of a table and pulling the Silo pattern over it so that the Silo becomes curved (**Fig. 4**). Make the Silo adhere to the cylindrical shape further by rolling the Silo around a pencil.
2. Apply Sticky Spots to the • markings on the Silo tab. Fold the other end of the Silo over the Sticky Spot tab.
3. Fold the lines on the Roof to form a contoured slope. Apply Sticky Spots to the • markings on the Roof tab. Place tab under the right adjoining edge of the Roof. Once lined up, press into place.
4. Apply three Sticky Spots to the top rim of the Silo (there are no • markings here). Press Roof into place. (**Fig. 5**)

Shed (Fig. 6)

1. Fold all score lines backwards and apply Sticky Spots to the • markings on the Shed's Wall tabs.
2. Line up the tab that has Sticky Spots with the other Wall's edge that doesn't have a tab and press into place so a corner is formed. Repeat this step with the other side so that a square is formed.
3. Fold Roof tabs to match angle of the Roof.
4. Apply Sticky Spots to the • markings on each Roof tab. Position the Roof so the back end is flush with the back Wall of the Shed, creating an overhang in the front. Press into place.
